Company Profile

Sunshine Decoration Company, is a professional manufacturer of PVC Indoor Decorative Materials products, is located in the Western Gujrat . The place is near to Mundra Port and National Highway To Connect Over India. the favorable geographical location and can be conveniently accessed. We are specially dealing in various PVC Indoor Decorative Material artificial marble / pvc stone profile, etc. with the advanced installation, solid technical strength, scientific management and excellent product quality. Facing the challenge of the keen international market competition, we are given more potential opportunities and meanwhile we are required to enhance our comprehensive ability to surge into the field. In order to be a better one, we have recruited numbers of professional personnel to set up a strong sales team. We are trying to help Boost the furnishing Industry.

Product Advantages

Green environmental protection

A unique manufacturing process, material and no formaldehyde, benzene and ammonia and other harmful substances, non-toxic, no radiation, green environmental protection.

B1 grade fire

Use of non combustible material of polymer board as the base material, B1 grade fire, can avoid the fire accident.

Economical and durable

One of the few, ecostone has main characteristics like abrasion resistance high hardness, economic and much durable.

Easy installation

Using General Machine tools can be cutting, sawing and Planing, 995 structural adhesive, glue, such as marble can make stickup and firm, and quick construction.

waterproof leak

The water resistance test, the most suitable for the restroom, kitchen and other damp places, has antibacterial function.

Clean wear

Surface special fluorine enamel paint has hardness, surface smooth dust is not easy to attach, bacteria is not easy to breed. the performance of the product, which is more excellent, is the product of the surface of the coating.

sound insulation

the density of the stone plastic fiber board is high, has a good sound insulation performance, and its thermal conductivity is small, so that the product has good performance of heat insulation.

Color rich

Stone grain color vivid images, let your living space meet in your ideal state, with than tile brighter more texture of the surface magnetization.
